

**YOSEMITE CHAPTER OF THE
INTERNATIONAL CODE COUNCIL**
Education Committee

**International
FireStop Council**

Presents:

July 8th – “FREE” FIRESTOP INSPECTION TRAINING

Who: Design Professionals, Contractors, Architects, Engineers, Fire Marshals, Fire and Building Inspectors

Topics Include:

- Containment in construction
- Code requirements
- How are Firestop Systems tested
- Each participant receives the IFC Firestopping Inspection Manual Pocket Guide, a comprehensive pocket reference.

The International Firestop Council (IFC) is a non-profit organization of industry experts committed to making buildings safer through compartmentalization and has developed this free Inspection of Firestop Systems seminar to assist Building Officials, Fire Inspectors, Fire Marshals, Design professionals, Contractors and more to ensure firestop systems meet governing codes. This presentation is a Generic, non-product specific, presentation given by the experts from the IFC membership. The free seminar focuses on the requirements, proper inspection and enforcement needed for various firestop applications.
